

# Leading Designers of Dallas - Ft. Worth

## Dream Designs. Delivered.

For the last 18 years, Nancy Black and Brent Willmott have been delivering custom, high-end design to residential and commercial clients who are looking for a concierge approach. “We don’t just come up with designs and drawings,” says Nancy. “We execute the entire process, and this is what sets us apart.”

Design balance, color theory, budget planning, and project management—it’s all part of the secret combination of skills Brent and Nancy show up with on each project. Intent on delivering a seamless client experience, the two founders can easily be described as the ying and yang of the design world. “My strengths are with color and design, and Brent can see through walls,” says Nancy.

“He’s so spatially gifted and incredibly creative.”

And it’s this perfect balance, combined with their highly skilled team, that consistently turns clients into raving fans. “As our newest designer, Kat Black takes our ideas and transforms them into inspired, 3D drawings. Our subcontractors don’t just know how we work, but they also share our same commitment to function and design. It takes an incredible team to deliver the types of experiences our clients receive,” says Nancy.
